DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, 33-41 and 42-50, are drawn to an apparatus, classified in class 48, subclass 76.
 - II. Claims 23-32, drawn to a method, classified in class 48, subclass 127.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus or by hand, or one which does not have a vaporization region.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

Art Unit: 1764

because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. David D'Ascenzo on 3/29/2007 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-22 and 33-50. Affirmation of this election must be made by applicant in replying to this Office action. Claims 23-32 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) This application contains claims directed to the following patentably distinct species of the location of the Treatment Region (24):

Species a-1, as shown in Fig. 1;

Species a-2, as shown in Fig. 7;

Species a-3, as shown in Fig. 8;

Species a-4, as shown in Fig. 9;

b) Further, this application contains claims directed to the following patentably distinct species of the Separation Region (32):

Species b-1, as disclosed in Fig. 1;

Species b-2, as disclosed in Fig. 2;

Art Unit: 1764

c) Further, this application contains claims directed to the following patentably distinct species of the vaporization feed stream(s) arrangement:

Species c-1, as disclosed in Fig. 3;

Species c-2, as disclosed in Fig. 4;

Species c-3, as disclosed in Fig. 5;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (either a-1 or a-2 or a-3 or a-4 and either b-1 or b-2 and either c-1 or c-2 or c-3) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species (either a-1 or a-2 or a-3 or a-4 and either b-1 or b-2 and either c-1 or c-2 or c-3) that is with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1764

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
